

# CUTOUTS BETA

Deconstruct inspirations for easy retrieval

# SET THE STAGE

The what, why, how, who. Here you are outlining the goal of the work and explain why it's a problem worth solving for the user (defined by a persona).

### The 'why'

A user's first experiences with Cutouts is vital to their decision of whether continue using it.

### Goals

- ✦ The fastest way to understand the value of Cutouts
- ✦ The start of Cutout's growth into a key component in a designer's workflow
- ✦ The simplest method for those who are in constant pursuit of inspiration to start building and creating

The opportunity

# WHAT IS THE VISION?

What needs to change? Why?

# OUTLINE THE VISION

Establish the current state. What works and what doesn't? Summarize the desirable future state. Why must we get there?

Today

# Fragmented experience

- ✦ **Disconnection:** There's a disconnect between the way we like to organize ourselves and how our tools like to organize us
- ✦ **Fragmented:** Current storage systems are not smart to convey the creative value from an asset

Tomorrow

# An extension of the user's mind

- ✦ Like your own little knowledge base, but without the effort of categorizing everything
- ✦ A place for the information in the user's brain to spill over, without the fear of losing it

# WHAT GUIDE OUR EFFORTS?

Design principles

What guide our design efforts?

Describe the key principles that guide and inform your design decisions. Gaining alignment on principles early in the process helps get buy-in.

Key design principles

MAKE FEWER ASSUMPTIONS

Meet new users where they are

---

DELIVER WORKFLOWS, NOT TECHNOLOGIES

Teach through action, not exposition

---

BUILD SKILLS TO FOSTER USEFULNESS & LOYALTY

Elevate users from beginner to adept

Instead of forcing users to adapt to new structures and mental models, Cutouts should be compatible our users' minds and workflows.

#### Key design principles

MAKE FEWER ASSUMPTIONS

Meet new users where they are

---

DELIVER WORKFLOWS, NOT TECHNOLOGIES

Teach through action, not exposition

---

BUILD SKILLS TO FOSTER USEFULNESS & LOYALTY

Elevate users from beginner to adept

Understanding how we make users' lives easier and their work more powerful drives learning and adoption.

#### Key design principles

MAKE FEWER ASSUMPTIONS

Meet new users where they are

---

DELIVER WORKFLOWS, NOT TECHNOLOGIES

Teach through action, not exposition

---

BUILD SKILLS TO FOSTER USEFULNESS & LOYALTY

Elevate users from beginner to adept

Best practices and use cases should help users move from their first cutout to those who can advocate for Cutouts and teach others.

Critical user journey (CUJs)

# GOALS AND TASKS

What use cases and goals are we focused on?

Designers

As a designer, I want to collect visual inspiration, save my favorite online resources and generate moodboards on the fly within seconds.

[link to CUJ](#)

Writers

As a writer, I want to take notes, free-write drafts, save text highlights from the web so I can collect inspiration for the next big article.

[link to CUJ](#)

Marketers

As a marketer, I want to keep a swipe file with inspiration and best practices for copywriting, sales, or campaign strategy.

Workflows

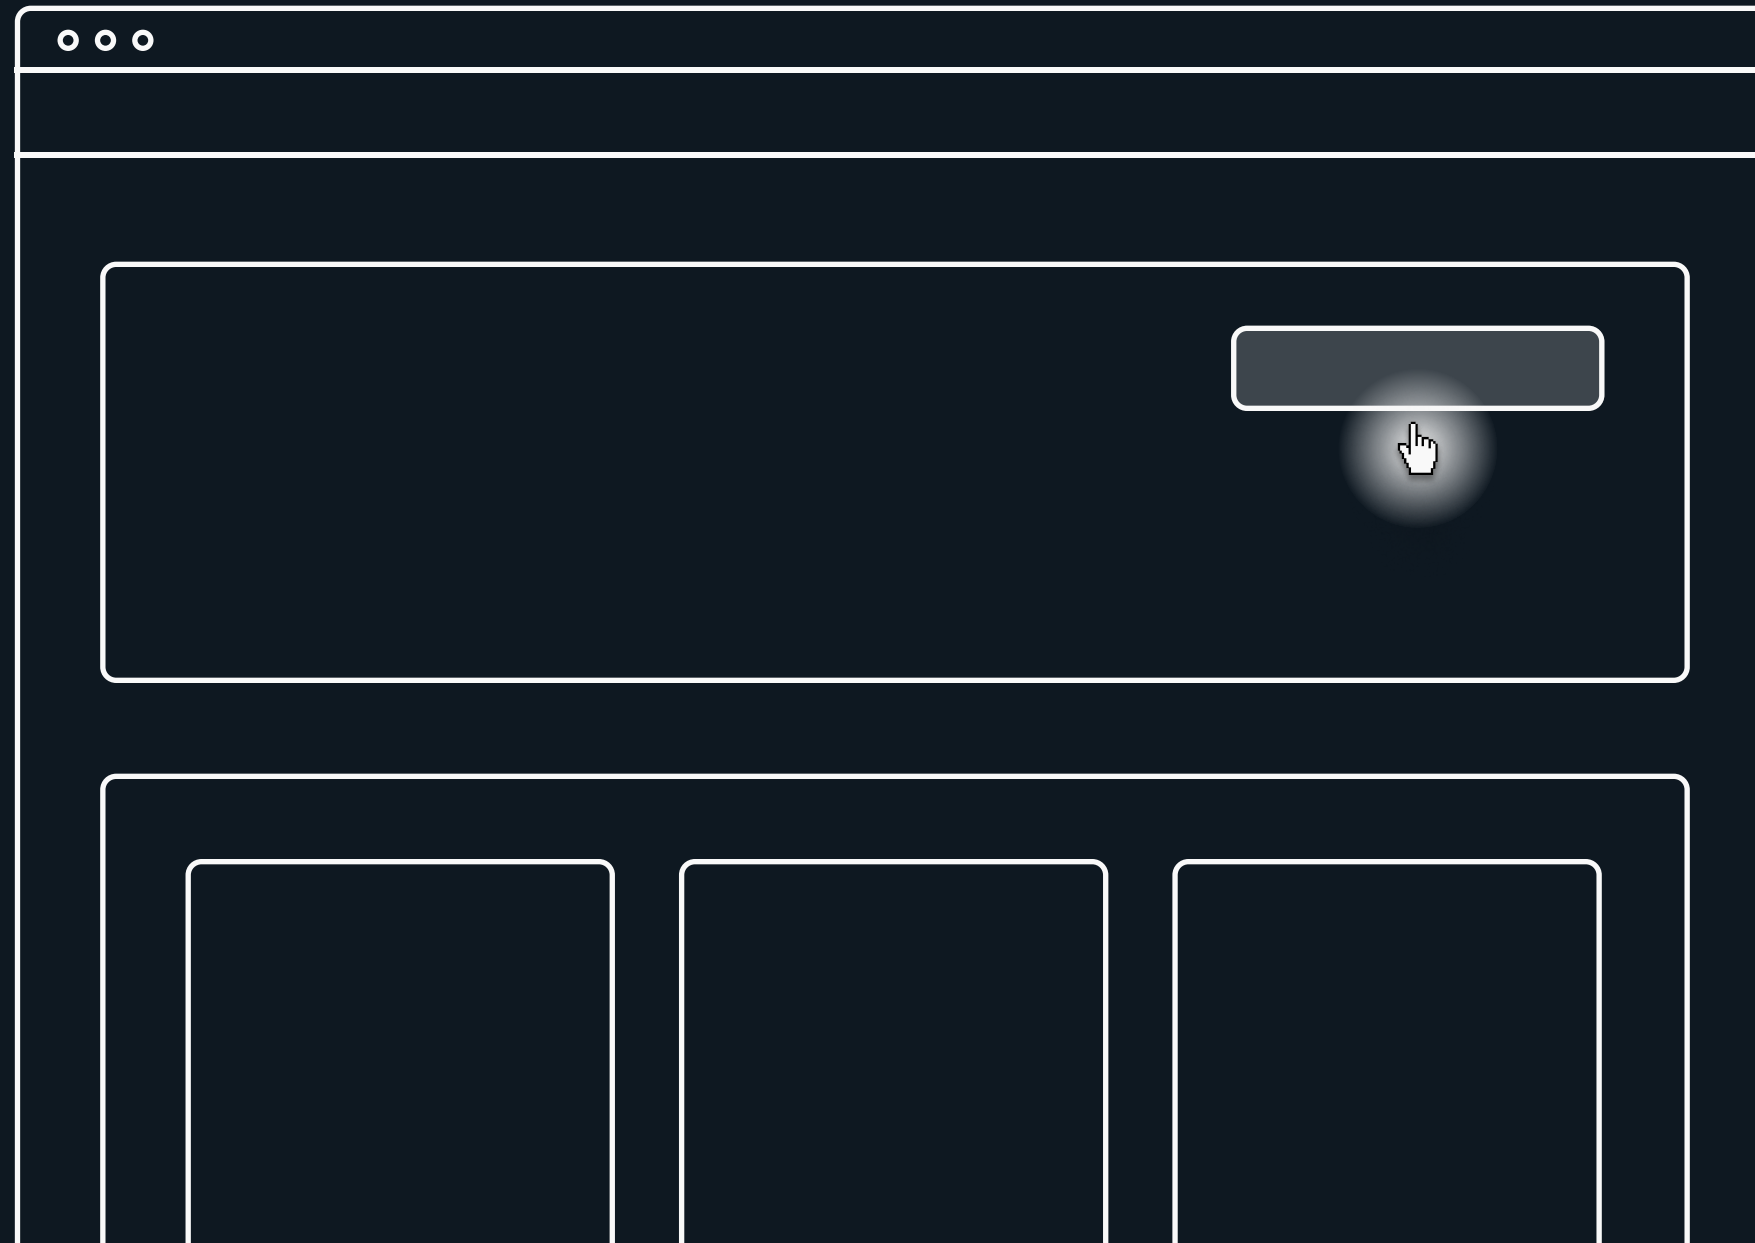

# PRODUCT CONCEPTS

How do we get to the future state?

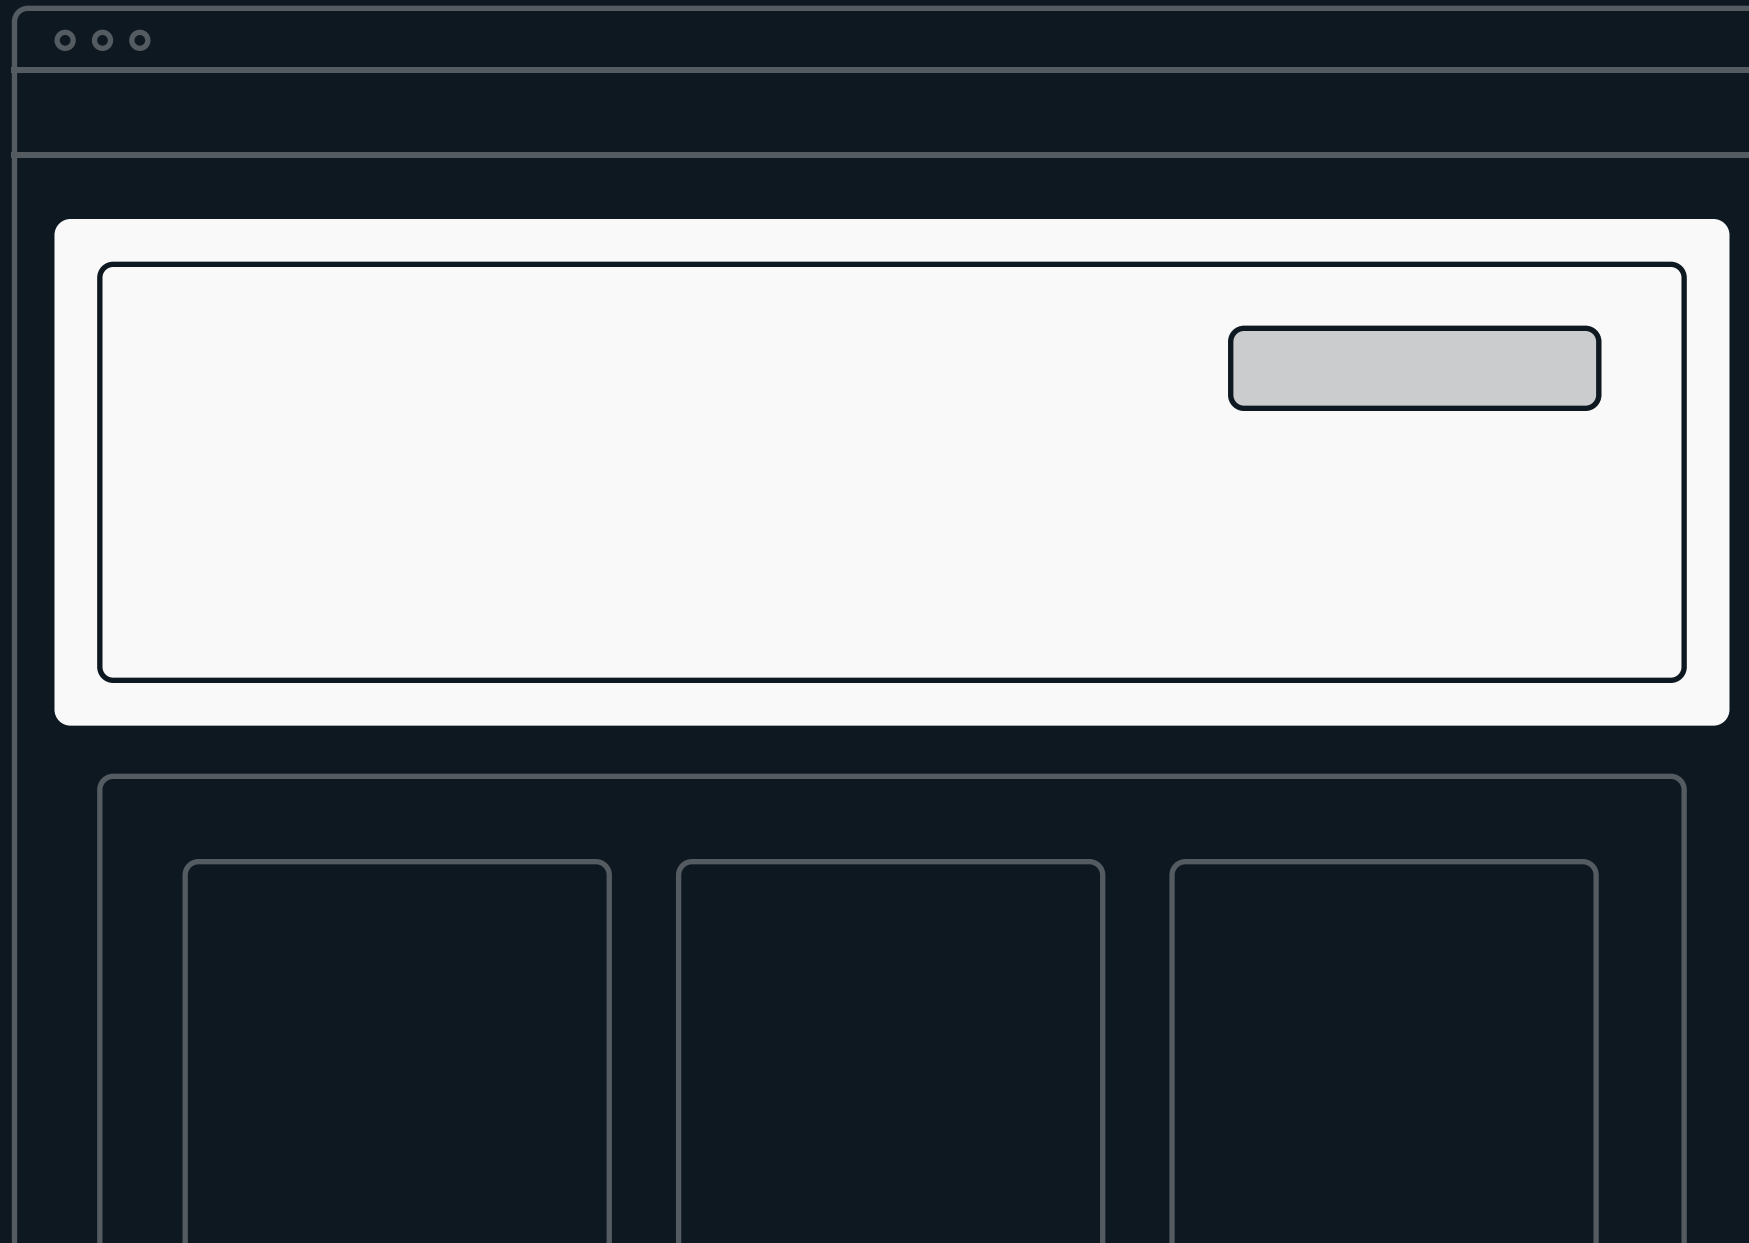

# OUTLINE THE WORKFLOWS

Detail the problem to be solved via conceptual diagrams or by presenting animated interactions to walk through designs.

Cursor animation to draw the  
eye to the point of interaction

UI spotlight to focus  
attention and tell the story

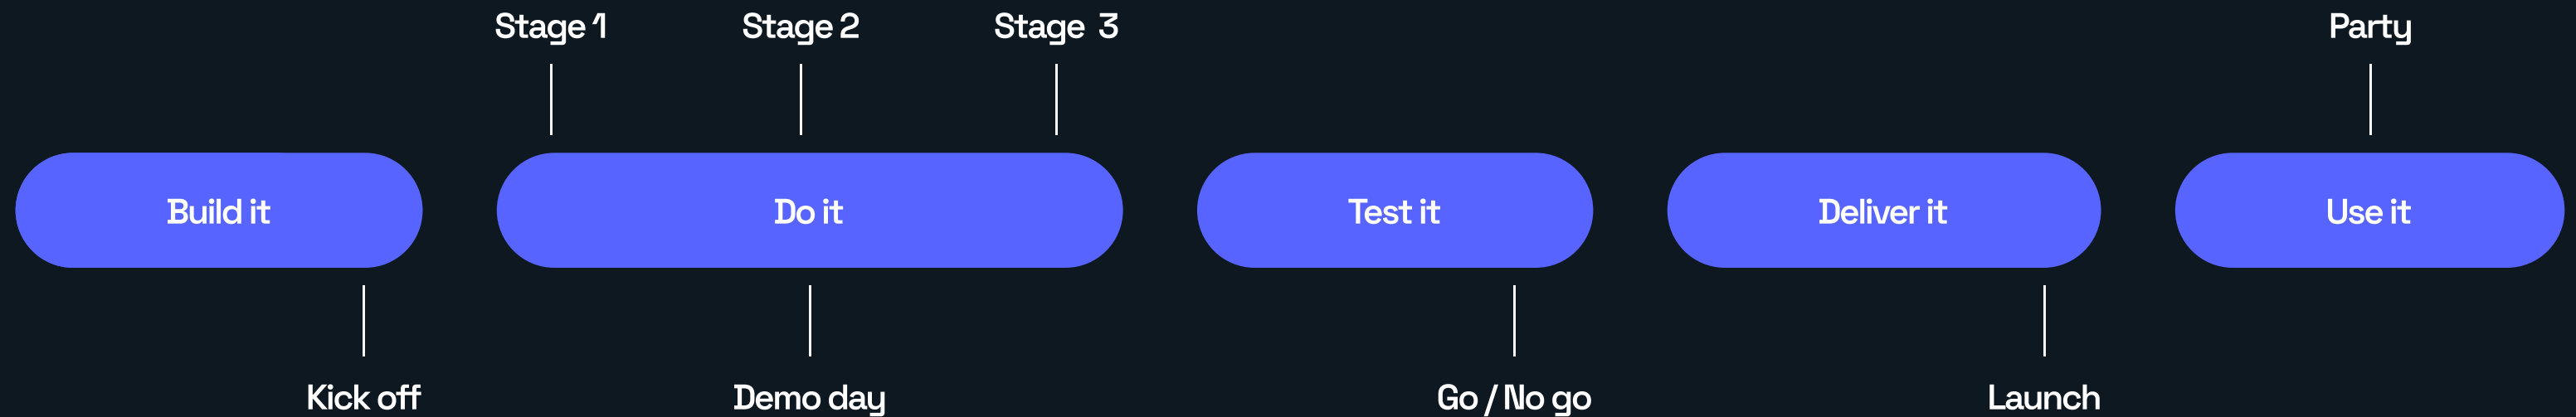

Next steps

**What does the future hold? How do we proceed from here?**

## How we'll measure success

This is where you can talk about your key performance indicators.

- |                                               |                          |
|-----------------------------------------------|--------------------------|
| ★ Monthly recurring revenue (MRR)             | ★ Traffic (paid/organic) |
| ★ Customer lifetime value (CLTV ov LTV)       | ★ Bounce rate            |
| ★ Customer acquisition cost (CAC)             | ★ Retention rate         |
| ★ Daily active user/monthly active user ratio | ★ Churn rate             |

Milestones make it easier to keep projects on track by calling out major events, dates, decisions, and deliverables. Remember to frame your milestones in terms of outcomes, and what you want to learn from them.
